

ened their own by leaving the proposals to a change of standard for future consideration. The opponents of the change must now show that while the change of the currency standard of value from silver to gold would benefit other nations, it would damage India. The whole question must, however, await the issue of the House of Commons, which is expected to be pointed in England to consider the question.

ENGLAND'S EGYPTIAN POLICY.

Labouchere Thinks Occupation of Egypt Should Cease.

LONDON, Feb. 3.—After a discussion of three hours the House of Commons declined to permit the inquiry and added that the statements were absolutely without foundation. The debate on the address proceeded monotonously until Henry Labouchere proposed an amendment in favor of withdrawing entirely from Egypt. He said the sooner the occupation of Egypt ceased the better it would be for all concerned as the khedive and his people were unalterably opposed to British rule. He hoped the government would treat with France in a friendly spirit on questions concerning withdrawal. Referring to an understanding that Lord Salisbury had assured Italy of British support in case of a war between Italy and France, Labouchere requested the prime minister to state that his government was in no wise responsible if Italy went to war with France.

Gladstone replied that he was not aware that anything had occurred since the accession of the present government to cause uneasiness about Great Britain's foreign relations. The government aided to maintain peace in Egypt, and he trusted it would be able to restore harmony.

AFTER THE TRUST.

The New Whisky Organization Completed at Louisville.

LOUISVILLE, Feb. 3.—At the opening of the second day's session of the National whisky dealers and distillers convention this morning the committee on permanent organization presented a draft of the constitution. The instrument provided that the name of the organization shall be known as the "American Distillers' and Wholesaler Liquor Dealers' association." It was decided to have printed 5,000 copies of the constitution, and the members of congress, J. B. Wathen was unanimously elected president; J. H. Holmes of Cleveland, made first vice-president and W. B. Lee of St. Louis, second vice-president. President Wathen announced at this afternoon's session that the board of control would meet on March 1 when the secretary and treasurer would be chosen. A resolution was adopted looking to the appointment of trustees by the whisky trust to take charge of the rebate fund.

The following letter charging the whisky trust with resorting to most desperate means of destroying competition was received by Chairman Payne today:

CINCINNATI, D., Feb. 1, '93.

CHARLES PAYNE, Esq.:

DEAR SIR: Among the business methods of the whisky trust now being investigated at Washington, none are more important than the methods of suppressing competition. I was employed by the secretary of the D. & C. F. company for a large sum of money to destroy their great Chicago rival. He furnished me apparatus to place under a tub and start a fire which would have swept the plant to destruction. I was arrested and speedily indicted. The trust lawyers were always on hand to see that no hearing was had, and after much putting off the case was finally dropped.

Myself and others with indisputable evidence have always been ready to testify and have the facts today. I have sent a strong recommendation to Mr. Burrows of the congressional committee. Will you please have the methods of suppressing competition brought to the notice of the committee of both houses of Congress and Senate.

Very respectfully yours,

T. S. DEWAR.

MT. Lookout station "C," Cincinnati. It will be remembered that charges were made against the trust some time ago and were then fully aired in the public press. The distillery, which attempt it was said was made to destroy, was the great Shufeldt concern.

TIN MINES CLOSED.

The Harney Peak Tin Company Shut Down Mine and Mill.

DEADWOOD, S. D., Jan. 3.—Superintendent Childs of the Harney Peak Tin company has just returned from New York and by his orders the mines and mills of the company have been closed down indefinitely, throwing between 300 and 400 men out of employment. The suspension caused a great surprise throughout this section, as the recent reports of operations were of a most encouraging nature. Superintendent Childs refuses to give any information except that to supply the mines and mills. It is stated on supposedly good authority that the entire plant has been sold to a Welsh tin syndicate, which is opposed to the production of tin in the United States.

DECLINING FREIGHT.

The Pacific Mail Company Unable to Make Rate to New York.

SAN FRANCISCO, Feb. 3.—The Pacific Mail Steamship company is declining freight for New York and Europe via the isthmus of Panama. The reason is the company's contract with the Panama railroad expiring Feb. 1. The freight rate cannot make a rate as it is not known what the Panama road will charge for its fractional share for transportation. This state of affairs promises to leave the New York and San Francisco without communication via the isthmus for some time.

Decided Against the Railways.

INDIANAPOLIS, Feb. 3.—The supreme court this afternoon affirmed the Big Four

railway tax case. It involves a million and a half of taxes yearly assessed against the Indiana railways by the board of tax commissioners. The roads must pay.

BARRETT'S MURDERER.

A Woman Confesses That Her Husband Committed the Crime.

ATLANTA, Ga., Feb. 3.—Walter Cochran is in jail charged by his wife with being the murderer of the Barrett family. Dr. Barrett had been a member of the state legislature and was prominent in business and professional circles. Saturday Cochran went home drunk and attacked his wife with a razor. In self-defense she shot her husband through the neck, which wound most likely resulted in death. Today she confessed that her husband had slain the Barrett family for money.

Wife Murderer Hanged.

SPRINGFIELD, Mass., Feb. 3.—Wallace W. Holmes, wife murderer, was hanged here this morning. The crime for which Holmes paid the penalty was peculiarly atrocious. In November, 1891, the body of his wife, who had been missing two months, was found in the cellar in the house. According to the testimony of his 9-year-old son Holmes, for a trivial cause, dragged his wife out of bed, kicked and beat her into insensibility, dragged the body to the cellar and buried it in a shallow grave. A postmortem examination showed sand in the lungs, indicating that the woman had been buried alive.

Clifford's Trial Begun.

PITTSBURGH, Feb. 3.—The trial of Jack Clifford for the murder of Pinkerton Detective Connors was resumed this morning. Captain Cooper of the Pinkerton force identified Clifford as one of the men he saw on the river bank at Homestead. He also said he recognized Hugh O'Donnell and Hugh Ross among the rioters. Several other witnesses reviewed the scenes of the riot and identified Clifford as a participant. One of the features of the day's proceedings was the absolute refusal of Judge Stover to permit the right of the Pinkertons to land to be questioned. He ruled out all questions asked by attorneys for the defense which tended in this direction.

Banks: "Rivers, how do you suppose that wonderful bird, the phoenix, ever came to be?"
Rivers: "Probably from a defective hen."—Chicago Tribune.

Housebuilding Is An Art.

That has been practiced among men for a considerable time, and one which we should think might fairly be expected to have reached a reasonable degree of perfection. And so it has. Yet who is there that has not known of houses which have taken fire from "defective flues"? This leads us to emphasize again the importance to you of the good mason who is also the honest man. We are not altogether disinterested in this. Good chimneys, good flues and stove men, are good friends. We wish you, in your interest as well as our own, to have a Jewel Range and although the Jewel Range is superior to other ranges, it is not superior to physical laws, and needs to be helped by a good draught, such as is secured only by a properly built chimney. Therefore, we say, make sure of the good mason!

And also, make sure of the Jewel Range. It will last you longer and serve you better than any other range that is made. As years go by it will cost you least for repairs. It ought to be in every house in Salt Lake—in Utah—in this whole country. Wherever there is a house without it, that house would be better with it. Ranges have been greatly improved of late years, and the Jewel Range is the result of the advances that have been made.

POSTAL INFORMATION.

Extracts from the Postal Laws Regarding Mailable Matter.

Foreign Postage Table—To most of the countries of the civilized world the rates of postage (except Canada and Mexico) are as follows:

	Cents.
For 5 grams (1/2 ounce).....	2
Postal cards, each.....	2
Newspapers and other printed matter per two ounces.....	1

COMMERCIAL PAPER.

Packets not in excess of ten ounces..... 5
Packets in excess of ten ounces, for each two ounces or fraction thereof..... 2
Registration fee on letters or other articles..... 10
That the working class, particularly those of foreign birth, are not aware of the fact that merchandise cannot be sent through the mails, unless prepaid at 5 cents per one-half ounce or fraction thereof, to countries outside of Canada and Mexico, is particularly noticeable.

Pairs of articles, two or more articles of exact counterpart, handkerchiefs, scarfs, needlework, articles of wearing apparel, perfectly whole and complete in themselves, whether sent in execution of an order or as a gift, can not be considered in any sense as samples, and can not be sent through the mails to foreign countries, unless prepaid at 5 cents per half ounce or fraction.

Christmas and New Year's cards and photographs with envelopes or articles bearing Christmas or New Year's greetings so elaborate in their design as to have an intrinsic value outside of the sentiment attached to them, such as satin, plush, cutlery, celluloid calendars, plaques, greetings in frames, cannot be sent through the mails to countries other than Canada and Mexico, unless prepaid at 5 cents per half ounce or fraction.

Wrapping—The use of a poor quality of wrapping paper for sending packages through the mails should be avoided. Packages should be wrapped in strong wrapping paper and tied with strong twine. It is not to be sent through any part of the package exposed; it should be so wrapped that it can be untied and examined without breaking a cord.

If the above rules were not followed, the sender's name and address should always appear on every article sent through the mails, preceded by the word "contents," so that the post office may serve few packages would go astray in the mails.

Packages of merchandise having a salable value, whether sent as presents or not, can not be sent through the mails to foreign countries except Canada and Mexico. Articles of any kind otherwise than through the mails, photographs, pictures and printed matter can not be closed against inspection, and sent at the cheaper rate of postage to foreign countries.

Turkish Proverbs.

Don't take a wife during the holiday season, and don't buy a horse in bad weather.
Two knives cannot find room in one sheath nor two loves in one heart.
When you are buying a horse don't consult a pedestrian, and when courting a woman don't ask advice of a bachelor.

Wounds caused by a sword can be healed, but wounds caused by a tongue can not.
